

HTML & CSS Lab Set Up

Step 1: Downloading VS Code

<https://code.visualstudio.com/download>

Step 2: Install the Live Server Extension (in VSCode)

To use this extension,

click “Go Live”  (in bottom right)

This shows you what your site looks like up to this point!

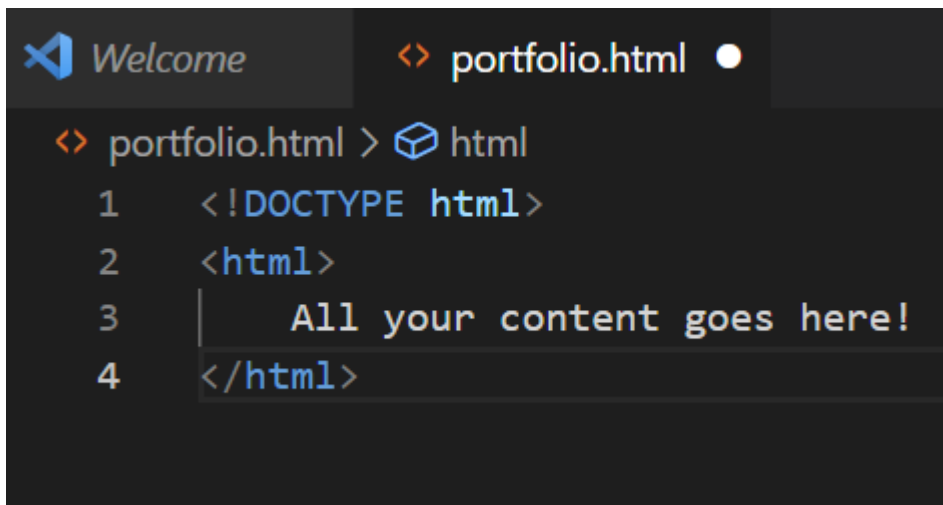

Step 3: Open a document

1. Create a folder on your computer named “PDF”
2. In VS Code, click “File” (top left), click “Open Folder”, and then select “PDF”
3. Now, click “File” (top left again), “New File”, and enter name “portfolio.html”

Now you’re ready to begin!

Step 4: Set up your document!

How to let computer know you’re creating in HTML

```
VS Code Welcome    <> portfolio.html ●
<> portfolio.html > html
1  <!DOCTYPE html>
2  <html>
3      All your content goes here!
4  </html>
```
